

B-RANGE ROLLER BLINDS

The Taylor B-Range of roller blinds finds a happy medium between a sheer fabric and a complete block-out. The fabric used allows sunlight to filter through but provides a high degree of privacy. These blinds are finished with a transparent coating that makes them suitable for any room in your home, including moist environments.

Roller blind screen shades are also referred to as sheer weave shades, solar shades, or screen shades. They consist of a single piece of material, not slats, and are used to block UV rays and reduce energy costs. The fabric is stiffened so that it can be rolled up easily when not being used.

Taylor Blinds and Shutters has been manufacturing blinds for over 50 years. It is a member of Trellidor Group, which will continue the Taylor family tradition of supplying innovative, top quality products backed by superb service and warranties.

FEATURES AND BENEFITS

- Made-to-measure for each window or door.
- Good UV control, reducing glare and heat penetration.
- Fabric finish choice dictates degree of light and privacy control.
