

# LE REVE BLACKOUT ROLLER BLINDS

Le Reve is part of the Taylor blackout roller blind collection and is used in homes and offices to darken the room. It is manufactured using a textured fabric with a foam coated acrylic backing on the reverse side that blocks out UV rays. All three colour options in the Le Reve range add an element of surface interest to the room. These roller blinds can be made for any window size including wider windows.

Roller blind screen shades are also referred to as sheer weave shades, solar shades, or screen shades. They consist of a single piece of material, not slats, and are used to block UV rays and reduce energy costs. The fabric is stiffened so that it can be rolled up easily when not being used. The Le Reve range is manufactured from 100% polyester with a colour co-ordinated foamed acrylic backing.

Taylor Blinds and Shutters has been manufacturing blinds for over 50 years. It is a member of Trellidor Group, which will continue the Taylor family tradition of supplying innovative, top quality products backed by superb service and warranties.

## FEATURES AND BENEFITS
