

# PVC BLACKOUT ROLLER BLINDS

Blinds that block out light completely are very useful for boardrooms, bedrooms and other environments that require total darkness. Our PVC roller blinds provide 100% blackout, darkening the room during daylight and providing privacy.

Roller blinds are also referred to as solar shades, or screen shades. They consist of a single piece of material, not slats, and are used to block UV rays and reduce energy costs. The fabric is stiffened so that it can be rolled up easily when not being used.

Taylor Blinds and Shutters has been manufacturing blinds for over 50 years. It is a member of Trellidor Group, which will continue the Taylor family tradition of supplying innovative, top quality products backed by superb service and warranties.
