

SCREEN ROLLER BLINDS

Roller blind screens are also referred to as sheer weave shades, solar shades, or screen shades. They are fabric window shades, not privacy shades. They consist of a single piece of material rather than slats, and are used to help block UV rays and reduce energy costs. The fabric is stiffened so that it can be rolled up easily when not being used.

These screens are a practical window treatment, offering a simple solution for controlling light and heat penetration into a room. There are various colour options and your choice will influence the degree of shading provided.

Taylor Blinds and Shutters has been manufacturing blinds for over 50 years. It is a member of Trellidor Group, which will continue the Taylor family tradition of supplying innovative, top quality products backed by superb service and warranties.

FEATURES AND BENEFITS

- Made-to-measure for each window or door.
- Good UV control, reducing glare and heat penetration.
- Fabric finish choice dictates degree of light and privacy control.
