

TRELLIDOR ALUMINIUM RETRACTABLE

The Trellidor Aluminium Retractable Security gate is elegant and uncluttered with no visible rivets. It is ideal for environments such as coastal areas as it is made from structural steel to avoid the corrosion problems associated with these conditions and to provide additional strength. These gates are top hung and engineered to open and close smoothly. They are fully framed to enhance their strength.

All Trellidor security barriers are manufactured at our LPCB ISO certified factory. The manufacturing process includes pre-treatment for enhanced corrosion and UV resistance before undergoing powder coating. This helps to retain the quality finish and increases the lifespan of the barrier, making them suitable for both coastal and inland conditions.

FEATURES AND BENEFITS

- Custom-made, fully framed aluminium sliding gates for doors.
- Manufactured from structural aluminium to avoid rust.
- Smooth exterior as there are no visible rivets.
- Fitted with a patented Trellidor locking system for additional strength.
- The Trellidor locking system allows for full engagement of three internal locking points using one key.
- Top hung for smooth sliding action when opening or closing the gate.
- Excellent quality glass-filled nylon wheels and sealed ball bearings contribute to smooth operation.
- Flights link three uprights together for easy operation, increased strength and neat stacking.
- Matches Trellidor Fixed range of burglar bars for windows in terms of style and strength.

WARRANTY

With the correct maintenance, our products will help keep both corrosion and criminals at bay. Ask your Trellidor Security Consultant about our recommended maintenance regime to ensure the validity of the full warranty.

Trellidor, Rollerstyle and The Ultimate Crime Barrier are registered trade marks of Trellidor (Pty) Ltd. As a conscientious consumer please remember that given enough time and the right tools, all security barriers can be breached no matter how well they're constructed. As a responsible manufacturer, however, we endeavour to design, engineer, test and install all our products to give our customers the best possible security barriers the technology at the time allows.

PRODUCT RANGE DIFFERENTIATOR

Features	Benefits	Trellidor Trojan II T1000	Trellidor T900	Trellidor T800	Trellidor T700	Trellidor TA600	Trellidor T500
1 Standard top track	Top hung unit for easy operation				●	●	●
2 Steel top track with cover	Prevents access to wheel assembly & corner cleat rivets	●	●	●	optional		
3 Stainless steel inserts inside uprights & links	Reduces the risk of flights and uprights being cut	●					
4 Steel rivets	Purpose designed for resistance during attack			●	●		●
5 Semi-tubular stainless steel rivets	Purpose designed for increased resistance during attack	6mm	5mm				
6 No visible rivets	Clutterless design for a neater finish					●	
7 Upright wheel holder assembly - customised with steel bearings	Stronger design to carry weight of top hung unit for easy operation	●					
8 Upright wheel holder - nylon wheel holder	Designed for smooth operation of unit	●	●	●	●	●	●
9 Roll-formed Steel	Increased overall unit strength	●	●	●	●		●
10 Structural Aluminum	Increased corrosion resistance					●	
11 Slamlock	One key locks at two points		optional	optional	optional		optional
12 Deadlock	One key locks at multiple points	●	●	●	●	●	2 lock points
13 Lock cover	Prevents access to lock box during attack	with cylinder shroud	●	●	●		●
14 Lock stile cover plate	Increases resistance during attack at locking points	●					
15 Upright sill guide - steel guide with semi-tubular rivets	Designed to resist extreme risk attack	●	●				
16 Upright sill guide - steel guide with zinc plated spacer tube and steel rivets	Designed to resist high risk attack			●	●		
17 Upright sill guide - nylon sill guide with zinc plated space tube and steel rivets	Designed to resist medium risk attack						●
18 Link closures - joined together with steel spacer tubes and recess bushes	Increased strength of flights under attack	●	●	●	●		
19 Link closures - joined together with nylon hinge pins	Strengthens flights under attack						●
20 Anchor plates - reinforced anchor plates at fixings into the wall	Increased strength on fixing holes	●	●	●	●		
21 Lattice link assembly	Strengthens bottom track under attack	2 hole	●	●
